EMPLOYMENT

CMG Financial – *Frontend Developer*

OCT 2022 – MAY 2026 | Remote

- Built a loan management dashboard using Angular 19 & 20 and C#, secured by MFA, which allows users to track loan application and mortgage details in real-time.
- Served as Release Coordinator for sprint cycles, facilitating cross-functional communication between Development, QA, and Product teams to ensure timely delivery of work items.
- Deployed full C# and TypeScript applications using Azure pipeline.
- Refactored a legacy Handlebars.js mortgage calculator to Angular 19 and redistributed it as a web component for organization wide use.
 - Used Azure to organize deliverables into milestones ensuring stakeholders had visibility into the project's progress.
 - Hosted knowledge transfer sessions for Engineering, QA, and Product teams documenting architectural decisions and best practices.
- Mentored junior developers on JavaScript and Angular best practices.

Anywear – *Full Stack Developer*

JUL 2024 – Current | Remote

- Built and maintained Node.js APIs using NextJS to enable modification of shipments, fittings, and stores backed by DynamoDB.
- Created vendor dashboard improvements using React and Typescript which allowed customers to manage their stores, schedule fittings, and interact with shipment lifecycles.
- Partnered with the design team to iterate on visual design and user experience using Figma.
